

HIT KANANI

hhit381@gmail.com — 6355535390 — Pune, India

 LinkedIn —  GitHub

Education

Veer Narmad South Gujarat University, Surat, India

BCA - Bachelor of Computer Applications

2022 – 2025

Distinction

Dy Patil University, Pune, India

MCA. in AI/DS (Artificial Intelligence And Data Science)

2025 – Present

Distinction

Skills

Programming Languages: Python, Java, JavaScript, C#, PHP, HTML

Libraries / Frameworks: Numpy, Pandas, Matplotlib, Seaborn, Pydantic, Tensorflow, Pytorch, Sklearn, Stremelit, No
Bootstrap, JQuery

Tools / Platforms: Git, GitHub, PowerBi, VS Code, Jupyter Notebook, Google Collab

Databases: SQL, MongoDB, MySQL, PostgreSQL

Projects / Open-Source

1. Ai ChatBot — Project Link — Live Link

Python(Using Mistral Model/Api), Front End(Stremelite), LangChain

- Developed a Python Based Project The Core Component Or Model Use In This Project Was Mistral Model With Api Key. And Front End Use Stremelit And Work Properly On Any System.

2. RAG Book Assistant — Project Link — Live Link

Python(Using Mistral Model/Api), Front End(Stremelite), LangChain, Chroma DB, PyPDF

- Built a RAG-based PDF question-answering system using LangChain, Mistral AI, and Streamlit that retrieves relevant document chunks and generates accurate, context-bound responses.

3. Multi-Agent Video-Transcript-AI — Project Link

Python(Using Mistral Model/Api), Front End(Stremelite), LangChain

- I built an AI Video Assistant that turns hour-long YouTube meetings into actionable intelligence in seconds. It transcribes (English Hinglish), summarizes, extracts tasks and decisions, and lets you ask questions — all powered by Mistral AI, LangChain, and Chroma DB.

4. ML Project Mansik Santula Score — Project Link — Live Link

Python(Using Machine Learning Algorithms), FastApi, Pydantic, Front End(HTML, Css, Js)

- Built a REST API with FastAPI and Pydantic to serve real-time mental health score predictions, enabling easy integration with front-end applications.

5. Restar-Amusement Park — Project Link

Web Development

- Developed a dynamic and database-driven web application using PHP and MySQL to manage and process user data efficiently. The project follows a structured MVC-style approach to ensure clean code organization, scalability, and maintainability. It includes secure user authentication, CRUD operations, and server-side validation to ensure data integrity and security.

Certifications

Certification Link

Deloitte	Data Analytics Job Simulation
JPMorgan Chase	Quantitative Research Job Simulation
AWS	Solutions Architecture Job Simulation
IBM	Data Analysis with Python
IBM	Machine Learning with Python
IBM	Python for Data Science
Microsoft	Power BI for Beginners
Oracle	MySQL HeatWave Implementation Certified Associate (Rel 1)
HCL GUVI	Introduction to Data Engineering & Big Data

Experience

Data Science & Analytics Intern	Amdox Technology	2 Months
--	-------------------------	----------

- Performed data cleaning, exploratory data analysis (EDA), and developed machine learning models
- Extracted actionable insights from datasets to support data-driven decision-making

Cloud Intern	Amazon Web Services (AWS)	Short-term
---------------------	----------------------------------	------------

- Gained hands-on experience in cloud computing fundamentals
- Worked with core AWS services and understood cloud deployment concepts

Data Science Virtual Internships	Codeveda — Cognify — Syntecxhub — Saiket	1 Month Each
---	---	--------------

- Completed multiple virtual internships focused on data science and machine learning
- Applied data cleaning, EDA, and basic machine learning techniques on real-world datasets

Campus Ambassador	Entrepreneurship Development Cell, IIT Delhi	2 Months
--------------------------	---	----------

- Led student outreach initiatives to promote entrepreneurship programs
- Organized events and increased student engagement in EDC activities

Summary

- Total Experience: 1 Year (combined internships)
- Currently seeking opportunities to apply data science and analytics skills in real-world environments
- Completed academic projects using Python
- Strong attention to detail, problem-solving mindset, and commitment to continuous learning
